Donn-

I understand from Greg Groogan of Fox 26 News here in town that emails have been sent (I assume by the EPA) that show the newIt found areas that are missing armor. He mentioned 5 areas, I believe.

If what he is telling me is correct about the email being sent, can you forward that email to me as soon as possible?

Scott

Subject: CAC notification; San Jacinto Waste Pits Superfund Site Update

This notice is in regard to a current site event:

?The PRPs are scheduled to conduct the assessment and repair beginning on March 9, 2016, with completion on March 11, 2016, weather and tide permitting. The Potentially Responsible Parties conducted a visual inspection of the cap on February 24 and found a couple of areas where geotextile fabric did not have armored rock cover. The PRPs notified EPA on March 4 and we directed them to place additional rock over these areas and approved a plan to conduct this work under EPA oversight.?

Local Congressional have been updated.

Thanks,
